

Year 4 Newsletter

Harvest

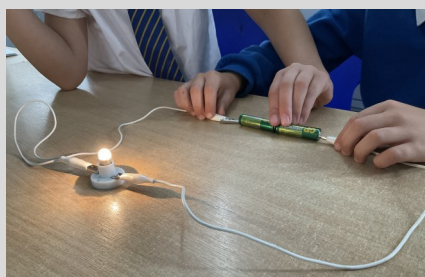

Harvest is a celebration that is worldwide, everybody can celebrate it. Year 4 celebrated it by performing a Harvest festival at the church for all the parents and the whole school. For harvest, we can all give to those who are in need. Our school collected food like cans of soup, tinned vegetables and coffee which we gave to the BESOM charity that is based in Camberley, anyone can donate to the charity! Harvest is very important for the world, and it is important that people have food. **By Lea (4C)**

English: The Iron Man

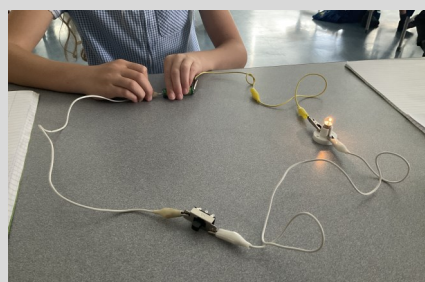

In English, we have writing about the journey of the Iron Man. We looked at describing his appearance and how he had arrived on Earth. We then wrote about how Hogarth discovered the Iron Man and tried to help him. Next, we wrote instructions about how to capture the Iron Man as he was eating all the farmers equipment! I loved learning about the Iron Man and even made one out of cardboard! **Kyle (4P)**

Science: Electricity

This term we have been looking at electricity. We have been creating lots of different circuits using wires, switches, bulbs and cells. We tested what happens to a circuit when a switch is opened or closed using a bulb. We also were lucky to have a visit from a STEM ambassador who told us about conductors and insulators. In class, we then

created an experiment about testing different materials to see if they conducted or insulated electricity.

Samuel and Jacob (4P)

Maths

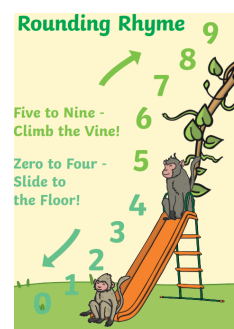

This half term, we have been looking at place value in maths. We have been representing numbers, rounding and adding 4-digit numbers.

In rounding, you always look in the column after the number, depending on the number you are rounding. For example, when rounding to the nearest 100, you check the tens column to see whether you round up or down.

When adding using the formal written method, you always start in the ones column because you might need to exchange, but it doesn't matter which number you place on top!

Nusaybah and Hannah (4M)

PE & Sport: Handball

In PE, we have been learning the sport handball which is a team game. We have learnt a lot of rules, such as you only have 3 seconds and 3 steps to hold and pass the ball. We have also learnt a lot of new skills like how to defend against other players by making yourself bigger, raising your hands, invading space and different passes. We have been playing matches using the skills we have learnt. **By Harley T (4C)**
